

locks

ABUS Germany is the only bike lock brand providing real security against theft, not just deterrence. Most of ABUS' competitors aim to impress the consumer with visually big and bold locks, but quite often use low grade materials in the hidden lock cylinders, locking mechanisms, and cables to save costs. It is ABUS' philosophy to put security and high quality into exactly those parts which make a lock secure, irrespective of whether they are visible from the outside or not. ABUS locks offer the highest security against theft methods such as "picking", ice spray, car jacks, hack saw, or lock drilling. If it's worth protecting, ABUS Germany is the only choice!

steel-o-x flex 1025
x-plus

part No: 33561-7
made in Germany

Hardened steel shells for good | protection against mechanical attacks
5mm twisted steel cable surrounded by 27mm hardened steel links
Patented ABUS Powercell technology and X-Plus cylinder offer top protection | Automatic snap-in locking mechanism | Handy carrier RB 95 available as accessory | ø27 mm and 100cm long

steel-o-chain 810

part No: 25712-4

8mm hardened square chain | Lock body protected by tough material | Self locking cylinder with drill protection and handy reversible key | Highly flexible for easy transport | 85 cm long

steel-o-flex centuro

part No: 860/110QS-RBU

Hardened steel shells for good protection against mechanical attacks
5mm twisted steel cable surrounded by 20mm hardened steel links
Quality cylinder, more than 1,000 key differs | Automatic snap-in locking mechanism | Includes bracket for multiple mount positions
ø20mm and 110cm long

steel-o-flex 900
armoured cable

part No: 900 / 100
Made in Germany

Hardened steel shells for good protection against mechanical attacks | 5mm twisted steel cable surrounded by 27mm hardened steel links | Quality cylinder, more than 1,000 key differs | Automatic snap-in locking mechanism | Handy carrier RB 95 available as accessory | ø27 mm and 100cm long

steel-o-flex
raydo

Part No:37531-6

Impressive combination of design and good security| Double security: hardened steel shells and steel cable | Press n shine function, the illuminated dials make setting the code easy even in the dark | ø20mm and 85cm long

Part No:23108-7

Basic protection by double security with hardened steel shells and flexible steel cable | 19mm hardened shell, 110cm long | PIN code can be set individually, easy to operate ergonomically designed dials, even in the dark To be used especially when several people use one lock.

booster 670

Part No: 10614 LLURB

With a strong coil cable and intergrated carrier for fixing at the frame or seat post bolt | With quality cylinder and coded reversible key
180cm, 12mm braided steel cable

steel-o-flex tresor

locks

> Second to none "in-house" research, development, design and testing capabilities > Highest standard of quality control - no production outsourcing
 > Up to date design through co-operation with insurance companies, testing institutes, and police forces > Comprehensive range for all security needs
 > World leader in home and bike lock security with over 80 years of experience.

granite x 54

- > 13 mm shackle made of special steel
- > ABUS-plus cylinder with anti-picking protection
- > ABUS powercell technology features highest impact and pulling protection
- > Abus X-plus security locking mechanism (incl. security card)
- > Maximum resistance against manipulation
- > 108mm wide, ø13mm, 230 or 300 mm long shackle

230 part No: 22978 TEXKF,
 300 part No: 22977 TEXKF
 Made in Germany

varedo 47 u-bolt

- > 12 mm shackle made of special steel
- > ABUS-plus cylinder with anti-picking protection
- > ABUS powercell technology features highest impact and pulling protection
- > Abus X-plus security locking mechanism (incl. security card)
- > Maximum resistance against manipulation
- > 108mm wide, ø13mm, 230 or 300 mm long shackle

230 Part No: 47 / 150HB230USH
 300 Part No: 47 / 150HB300USH
 Made in Germany

43 sinero

- > Shackle made of special steel. 12mm
- > ABUS quality cylinder
- > Strong lock body of hardened steel protects the locking mechanism
- > With universal bracket (USH) for frame fixing
- > comes in two length 230 mm and 300 mm
- > double locking mechanism
- > 109 mm wide ø 12mm 230 or 300 mm long shackle

230 part no: 43/150HB230USH
 300 part No: 43/150HB300
 Made in Germany

buffo 34 u-bolt

- > 12 mm hardened Steel shackle provides a high level of security
- > Double locking mechanism
- > Protective cylinder with keyhole cover
- > 109mm wide, ø12mm, 230 or 300mm long shackle
- > Frame mounting bracket included
- > Fits frame tubes from 28-35mm ø

230 mm model Part No: 21467-USH
 300 mm model Part No: 21467-300 USH

bordo 6000-90

- > The innovation for all cyclists whether hobby cyclists or pros
- > New link construction offers maximum flexibility for external securing.
- > Super compact lock dimensions in handy size for very fast mounting
- > Handy bag protects against dirt
- > ABUS Extra-Classe cylinder with coded reversible key
- > 75cm & 90cm long

Part No: 33567-9
 Made in Germany
