Paqua is a personal dry bag / pouch, designed to be worn in one of two ways:  
 (1) Around the waist, in the small of the back, or  
 (2) Over the shoulder, secured with an additional strap  
 whilst participating in regular and extreme sports activities – including water sports, snow sports, outdoor etc.

**PRODUCT FEATURES / BENEFITS:**

Paqua is watertight - you can swim with the Paqua, or immerse it in up to 2m of water for extended periods – whilst the contents remain secure, dry and free from water

Unique (Patented) Paqua Insert keeps all contents accessible, including 2 zippered pockets for cash, coins, cards etc, and an additional mobile phone pouch so *you can* speak on the phone with wet-hands

Using the tried and tested Tri-Fold Air-Lock system, Paqua remains water-tight in up to 2m of water, over extended periods

The cleverly designed buckle, belt and toggles remain out of the way when lying on the stomach – ideal for surfing and other similar sports activities

Worn around the waist, Paqua is designed to sit in the small of the back and the neoprene-net backing is extremely comfortable to wear on the skin, or over clothing

The supplied shoulder strap will allow Paqua to be worn over the shoulder also, as a comfort / access option

An external "easy-access" pocket is provided for non-valuable items such as sunscreen

Paqua is made from light-weight, highly durable neoprene, TPU nylon and PVC materials, and is manufactured to the stringent US Coast Guard Certification Standards

Paqua is also designed to float, so if it falls into the water (from a boat etc), the Paqua will float with your valuables inside

The adjustment belt ensures the Paqua will fit virtually everybody.

Be sure to watch our web-site for up and coming additions to the Paqua Range
